## ABOUT US

Urban Front® are specialist designers and manufacturers of unique, elegant and contemporary doors. Each of our hand-made external doors is made here in the UK and is registered with the UK Intellectual Property Office, making all of our doors distinctive in design and completely bespoke.

Following extensive research in the past few years, we have carefully selected our woods to ensure prime quality, durability and a beautiful finish. High quality components are imported from Europe to complete the overall standard of our doors. These include a specifically designed steel reinforced core with anti-warping, security and insulation values, three-dimensional adjustable concealed hinges, high-security single lock, security keys and high-grade stainless steel fittings.

We are constantly improving our product range, introducing new designs and developing our manufacturing processes.

## OUR DOORS

"The difficulty lies not so much in developing new ideas as in escaping from the old ones."

*Quote by John Maynard Keynes*

Sorrento in Iroko stained ebony

Door Furniture: Option 11

**Door Name:** Rondo  
**Wood:** European Oak with Sadoline clear finish  
**Layout:** with overpanel and side light  
**Door Furniture:** Option 6 with letterplate

## Wood Types

All our doors can be ordered in the types of wood listed below. Please read all the details about the wood types carefully. Some wood types are only suitable for semi-protected areas and may not be suitable for your house.

Where possible, Urban Front® will endeavour to use timber from sustainable forests. However, if you are undertaking an eco-friendly project, it is necessary to be aware that some of the woods listed in the brochure are at times unavailable from sustainable forests.

### Western Red cedar

WRC is famous for its variation in colour ranging from chocolate brown to reddish brown to salmon pink although the main colour is reddish brown. This wood is moderately very durable and therefore is light in weight and a softer timber than all the other woods listed on this page. It is less resistant to splitting and indentation and can mark very quickly.

### Iroko

When freshly cut, Iroko has a distinct yellow colour and only changes to a golden brown when exposed to light. With excellent strength properties, it compares well with teak though weaker in bending and in compression. With a medium texture and small moisture movement, it is used mainly for exterior joinery and bridge construction.

### American walnut

Walnut is a dark brown/black or a rich purplish-black colour and has a fine even texture and a rather coarse grain. Moderately durable and with a medium moisture movement, it isn't usually used externally. It would be a pity not to be able to use such a beautiful wood, so we advise that it is only used in a protected area. The door should be used within a porch area where it isn't affected by weather conditions.

### European Oak

This yellowish-gold brown hardwood is known for its high strength properties and its durability. Its moisture movement is medium and it has a good density with a medium to coarse texture. It is used for heavy structural use, cladding, exterior and interior joinery, furniture and flooring.

### Wenge

Mainly found in Zaire, Wenge is a very dark brown colour with close blackish veins and has a good resistance to bending and shock. Very durable with small moisture movement, it also has a coarse texture. It is mainly used for exterior and interior joinery.

## DOOR CONSTRUCTION & HARDWARE

'Our high quality components are imported specifically from Europe and tested to European standards to complete the overall standard of our doors. These include:

### Steel Reinforced Core

In general, warping is a common disadvantage to solid wood doors. To prevent this we have introduced our steel reinforced core which is designed to reduce potential warping between extreme temperatures to the absolute minimum. In addition, your Urban Front® door also has an insulation value of up to 1.1U value (U values slightly vary on wood types used).

### Concealed 3D Hinges

Contemporary yet very functional additions to your door are the concealed hinges which have numerous benefits. As well as being invisible from the inside, the two 3D concealed hinges fitted to your door, give you the flexibility to adjust the door and frame height, depth and alignment with an Alan key.

### Locks and Cylinders

Your Urban Front® door comes fitted with a high security 4 bolted mortice lock, security keyed cylinder thumb turn and 3 security keys.

*For more information regarding these components, please see our Technical Information brochure or our website.'*
